Installing Data

Before you begin you must exit AnySite if it is open and back up any custom files you have in your current installation (for details, see the “Upgrading Your Current Installation” chapter of the [AnySite Version 8.8 Install Guide](#)).

To install the AnySite data update onto a local machine:

1. Place the AnySite data update DVD in the media drive.
If the installation does not automatically start, click **Run** from the Microsoft Start menu, and click the **Browse** button. Go to the media drive and select **Launch.exe**.
Select **Install**, and then select **Install AnySite**.
2. At the prompt, click **Yes** to accept the upgrade.
3. The Welcome screen appears.
Click **Next** to continue.
4. Continue with the upgrade installation instructions in the “Upgrading Your Current Installation” chapter of the [AnySite Version 8.8 Install Guide](#).

Manual Installation Instructions

If running the installation via **Launch.exe** from the DVD did not work, you can also install the data update by simply copying the new data files and the AnySite Repository Transfer (ART) file from the AnySite DVD to your AnySite installation location.

To copy data files:

1. Place the AnySite DVD in the DVD drive. The Welcome screen appears.
2. Click **Browse CD**.
3. Click **Browse Now**.
4. Launch Windows Explorer.

5. In Windows Explorer, navigate to the ASDE folder on the AnySite DVD. The ASDE folder is located under ...Upgrade\Data\ASDE.
6. In the ASDE folder on the AnySite DVD, highlight **all** of the files by clicking **Select all** from the **Edit** menu. Copy all of the files by clicking **Copy** from the **Edit** menu.
7. In Windows Explorer, navigate to your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_CA\Data\ASDE.
8. In the ASDE folder in your AnySite installation, paste the files by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files when prompted.

To copy the ART files:

1. In Windows Explorer, navigate to the ART Files folder on the AnySite DVD. The ART File folder is located under Upgrade\ART Files.
2. In the ART Files folder, select the updated ART files that you purchased and are licensed for:
 - **PBBI Canada 2010 Standard Bundle.art**
 - **PBBI Canada 2010 Business Reports.art**
 - **PBBI Canada 2010 CANEX Food Reports.art**
 - **PBBI Canada 2010 CANEX Reports.art**
 - **PBBI Canada 2010 Disposable and Discr Income Reports.art**
 - **PBBI Canada 2010 HHId Facilities and Equipment Reports.art**
 - **PBBI Canada 2010 NVR_TVIO Reports.art**
 - **PBBI Canada 2010 PSYTE Advantage Reports.art**
 - **PBBI Canada 2010 PSYTE HD Fin Reports.art**
 - **PBBI Canada 2010 PSYTE HD Reports.art**
 - **PBBI Canada 2010 Wealth Report.art**
3. Copy the files by clicking **Copy** from the **Edit** menu.
4. In Windows Explorer, navigate to your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_CA\ART Files.
5. In the ART Files folder in your AnySite installation, paste the file by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files if prompted.

To copy the documentation files:

1. In Windows Explorer, navigate to the Documentation folder on the AnySite DVD. The Documentation folder is located under Upgrade\Documentation.
2. In the Documentation folder, select all the files and click **Copy** from the **Edit** menu.
3. In Windows Explorer, navigate to the Documentation folder in your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_CA\Documentation.
4. In the Documentation folder in your AnySite installation, paste the files by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files if prompted.

Installing the License

For this data update, you must install the license file.

1. Place the License CD in the DVD drive.

If the installation does not automatically start, click **Run** from the Microsoft Start menu, browse to the DVD drive, and select **INSTALL.EXE**.

2. In the License Installer screen click **Install** to copy the license file to your AnySite ASDE folder (ensure the path is correct for your installation C:\Program Files\MapInfo\AnySite_CA\Data\ASDE is the default location).
3. A notice dialog appears. Click **OK** when prompted that the installation is complete.
4. **Important:** Locate the new cledata.cdl and cledata.cdl.icn geolicense files on the License CD, then manually copy them to your ASDE folder. This action is required due to a known issue with the license installer (see **Geolicense Files Not Copied After Upgrade Install on page 3**).

If the license installation is not working, point to the license file using AnySite Configurator:

1. Open the AnySite Configurator.
2. From the **Tools** menu, select **ASDE Settings**.
3. In the License Path text area, click the **Browse** button and point to the new license file (for example, C:\Program Files\MapInfo\AnySite_CA\Data\ASDE\[NAME].lic).
4. Click **OK**.

Importing ART Files

After installing the license, import the ART files. To do this:

1. Launch the Configurator.
2. From the **Tools** Menu, select **Import Preferences**.
3. In the Import Preferences dialog:
 - a. From the **Look in** list, select the **ART Files** folder where AnySite is installed. The default location is C:\Program Files\MapInfo\AnySite_CA\ART Files.
 - b. From the list of files, select **PBBI Canada 2010 Standard Bundle.art**.
 - c. Click **Open**.
4. In the Select Preferences to Import dialog, select all of the reports in the list and click **OK**.
Choose to overwrite the existing files if prompted.
5. Repeat steps 2–4 for each of the additional ART files that you purchased and are licensed for.

Your data update is now complete. Restart AnySite to begin working with the data.

Known Issues

ART Files not Removed by the Installer

Previous year's data and report files (.ART files) are not removed by the installer.

Data Refresh Overwrites Previous Hot Fixes

Reinstall any hot fixes that you had installed prior to this data refresh.

Contact Technical Support for assistance with hot fixes for AnySite (see **page 1** for contact information).

Geolicense Files Not Copied After Upgrade Install

After the data installation, the attributes of the geolicense files cledata.cdl and cledata.cdl.icn are set to **Hidden**. If you attempt to run the license CD after this installation, these files are not copied over due to the change in file properties. If you are an upgrade customer, you must manually copy the two files (cledata.cdl and cledata.cdl.icn) to the ASDE folder as per **step 4** at the top of page 3.
