August 2010

Installing Data

Before you begin you must exit AnySite if it is open and back up any custom files you have in your current installation (for details, see “Upgrading Your Current Installation” chapter of the [AnySite Version 8.8 Install Guide](#)).

To install the AnySite data update onto a local machine:

1. Place the AnySite data update DVD in the media drive.
If the installation does not automatically start, click **Run** from the Microsoft Start menu, and click the **Browse** button. Go to the media drive and select **Launch.exe**.
Select **Install**, and then select **Install AnySite**.
2. At the prompt, click **Yes** to accept the upgrade.
3. The Welcome screen appears.
Click **Next** to continue.
4. Continue with the upgrade installation instructions in the “Upgrading Your Current Installation” chapter of the [AnySite Version 8.8 Install Guide](#).

Manual Installation Instructions

If running the installation via **Launch.exe** from the DVD did not work, you can also install the data update by simply copying the new data files and the AnySite Repository Transfer (ART) file from the AnySite DVD to your AnySite installation location.

To copy data files:

1. Place the AnySite DVD in the DVD drive. The Welcome screen appears.
2. Click **Browse CD**.

3. Click **Browse Now**.
4. Launch Windows Explorer.
5. In Windows Explorer, navigate to the ASDE folder on the AnySite DVD. The ASDE folder is located under ...Upgrade\Data\ASDE.
6. In the ASDE folder on the AnySite DVD, highlight **all** of the files by clicking **Select all** from the **Edit** menu. Copy all of the files by clicking **Copy** from the **Edit** menu.
7. In Windows Explorer, navigate to your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_UK\Data\ASDE.
8. In the ASDE folder in your AnySite installation, paste the files by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files when prompted.

To copy the ART files:

1. In Windows Explorer, navigate to the ART Files folder on the AnySite DVD. The ART File folder is located under Upgrade\ART Files.
2. In the ART Files folder, select the **MapInfo UK 2010** ART files:
 - MapInfo UK 2010 Basic Bundle.art
 - MapInfo UK 2010 Business Turnover Reports.art
 - MapInfo UK 2010 Goods Expenditure Estimates.art
 - MapInfo UK 2010 Goods Expenditure Projections.art
 - MapInfo UK 2010 Leisure Expenditure Estimates.art
 - MapInfo UK 2010 Leisure Expenditure Projections.art
 - MapInfo UK 2010 Population Projections Reports.art
 - MapInfo UK 2010 Thematics.art
 - OEM Streets Map Preferences.art
 - UK_MPF_2010.art
3. Copy the files by clicking **Copy** from the **Edit** menu.
4. In Windows Explorer, navigate to your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_UK\ART Files.
5. In the ART Files folder in your AnySite installation, paste the files by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files if prompted.

To copy the documentation files:

1. In Windows Explorer, navigate to the Documentation folder on the AnySite DVD. The Documentation folder is located under Upgrade\Documentation.
2. In the Documentation folder, select all the files and click **Copy** from the **Edit** menu.
3. In Windows Explorer, navigate to the Documentation folder in your AnySite installation. The default AnySite location is C:\Program Files\MapInfo\AnySite_UK\Documentation.
4. In the Documentation folder in your AnySite installation, paste the files by clicking **Paste** from the **Edit** menu.
Choose to overwrite the existing files if prompted.

Installing the License

For this data update, you must also install the license file.

1. Place the License CD in the DVD drive.

If the installation does not automatically start, click **Run** from the Microsoft Start menu, browse to the DVD drive, and select **INSTALL.EXE**.

2. In the License Installer screen click **Install** to copy the license file to your AnySite ASDE folder (ensure the path is correct for your installation C:\Program Files\MapInfo\AnySite_UK\Data\ASDE is the default location).
3. A notice dialog appears. Click **OK** when prompted that the installation is complete.
4. **Important:** Locate the new cledata.cdl and cledata.cdl.icn geolicense files on the License CD, then manually copy them to your ASDE folder. This action is required due to a known issue with the license installer (see **Geolicense Files Not Copied After Upgrade Install on page 4**).

If the license installation is not working, point to the license file using AnySite Configurator:

1. Open the AnySite Configurator.
2. From the **Tools** menu, select **ASDE Settings**.
3. In the License Path text area, click the **Browse** button and point to the new license file (for example, C:\Program Files\MapInfo\AnySite_UK\Data\ASDE\[NAME].lic).
4. Click **OK**.

Importing ART Files

After installing the license, import the ART file. To do this:

1. Launch the Configurator.
2. From the **Tools** Menu, select **Import Preferences**.
3. In the Import Preferences dialog:
 - a. From the **Look in** list, select the **ART Files** folder where AnySite is installed. The default location is C:\Program Files\MapInfo\AnySite_UK\ART Files.
 - b. From the list of files, select the **MapInfo UK 2010 Basic Bundle.art** file.
 - c. Click **Open**.
4. In the Select Preferences to Import dialog, select all of the reports in the list and click **OK**.

Choose to overwrite the existing files if prompted.

5. Repeat steps 2–4 for each of the additional ART files:
 - MapInfo UK 2010 Business Turnover Reports.art
 - MapInfo UK 2010 Goods Expenditure Estimates.art
 - MapInfo UK 2010 Goods Expenditure Projections.art
 - MapInfo UK 2010 Leisure Expenditure Estimates.art
 - MapInfo UK 2010 Leisure Expenditure Projections.art
 - MapInfo UK 2010 Population Projections Reports.art
 - MapInfo UK 2010 Thematics.art
 - OEM Streets Map Preferences.art
 - UK_MPF_2010.art

Your data update is now complete. Restart AnySite to begin working with the data.

Data Vintage

The following table shows the vintage of data was used for building this release.

Level	Code	Count	Source	Vintage
Output Areas	OA	223,060 C	ONS, GROS and NISRA	2001
Super Output Areas	SA	41773	ONS, GROS and NISRA	2001
Wards	WD	10,654 C	ONS, GROS and NISRA	2001
Local Government Area	LG	434 C	ONS, GROS and NISRA	2001
County	CO	147 C	ONS, GROS and NISRA	2001
Government Office Region	GOR	12 C	ONS, GROS and NISRA	2001
Country	NT	4 C	ONS, GROS and NISRA	2001
Great Britain/Northern Ireland	GB	2 C	ONS, GROS and NISRA	2001
United Kingdom	UK	1 C	ONS, GROS and NISRA	2001
Postal Sectors	SC	9,506 N	Collins Bartholomew	Release 49
Postal Districts	DS	2,832 N	Collins Bartholomew	Release 49
Postal Areas	AR	124 N	Collins Bartholomew	Release 49

Information for Upgrade Customers

For customers who are upgrading their version of AnySite UK.

In upgrade install, Major Town report will show blank in '*Town Name*' column by default. You would require manual copying of ***Anysite.mdb*** file from the UK Installation Media 2010, to view the complete report.

Known Issues

ART Files Not Removed by the Installer

Previous year's data and report files (.ART files) are not removed by the installer.

Data Refresh Overwrites Previous Hot Fixes

Reinstall any hot fixes that you had installed prior to this data refresh.

Contact Technical Support for assistance with hot fixes for AnySite UK (see [page 1](#) for contact information).

Geolicense Files Not Copied After Upgrade Install

After the data installation, the attributes of the geolicense files `cledata.cdl` and `cledata.cdl.icn` are set to **Hidden**. If you attempt to run the license CD after this installation, these files are not copied over due to the change in file properties. If you are an upgrade customer, you must manually copy the two files (`cledata.cdl` and `cledata.cdl.icn`) to the ASDE folder as per [step 4](#) on page 3.

Exporting Dot Density Maps Correctly

Dot Density maps should be exported separately and not by creating Packages from AnySite Configurator. You can export it, by first applying the required Dot Density on map and then select **File>Export>Current Map** options in AnySite. Dot Density maps do not get exported correctly, if exported through packages in AnySite Configurator.

Reference to Variables of Custom Index

While including variables for a custom Index Report, you should always choose appropriate '*Report Item*' or *.asg file* reference in AnySite Configurator. This detail is available in UK_2010_Data_Dictionary.xls in the Documentation folder of AnySite UK Install.

Format Definitions for Custom Reports

You need to manually specify the format for each variable used, while creating any custom report in AnySite Configurator.

Functionality Support for Windows 7

Windows 7 Support for AnySite UK

We do not officially support AnySite UK on **Windows 7**, but still if you want to install and use AnySite UK on a Windows7 machine, you need to modify the compatibility settings manually:

1. In Windows 7 install, you should change the default install path from **C:\Program Files\MapInfo\AnySite_UK** to **C:\MapInfo\AnySite_UK**.
2. You must update **geojni.cgf** present at path (C:\MapInfo\AnySite_UK):- **Open** the file in *Notepad*, **Update** the *Djava.class.path* variable with the installation path **C:\MapInfo\AnySite_UK\~**, and replace it for all occurrences.
3. If running installation on Windows 7 on default path C:\Program Files\MapInfo\AnySite_UK, then you must log-in as **Administrator** or choose **Run as Administrator** option by right-clicking the **Launch.exe**.
4. If upgrading AnySite UK on Windows 7 at default path C:\Program Files\MapInfo\AnySite_UK, then you need to use the **Run as Administrator** option on **AnySite.exe**.
5. Installing UK Segmentation in Windows 7, both AnySite UK E&P and Segmentation plug-in needs to be installed outside the default windows path (typically at **C:\Programs Files\MapInfo\AnySite_UK**) and *Segmentation Directory* path in ASDE Settings of AnySite Configurator needs to be configured accordingly. However, it is recommended to Install Segmentation on **Fresh AnySite UK** Install and not on **Upgrade**. You are required to Copy/Replace any specific custom profiles if created earlier.
6. In upgrade install of AnySite UK, *Major Town* report will not display town names in the first column (Town Name) in spite of replacing the current **AnySite.mdb** file from UK Installation Media 2010.
7. For transportation symbols to display correctly in AnySite, the transportation font file: *TTMITC_.TTF* has to be copied at location C:\Windows\Fonts manually. This file can be found in UK Installation Media at path (AnySite_88 <DriveName>\Upgrade\Data\STREETS).
8. To view reports accurately in Windows 7, WordPad alignment can be re-adjusted by clicking on **View>Word Wrap>Wrap to window**.

Note The above observations are results of testing performed on Windows 7 PROFESSIONAL (32 Bit) & Windows 7 ULTIMATE (32 Bit).
